

# Gloss Plus

## Water Based Sealer Finish

- Easy to use wet look finish floor polish
- Burnishable from 250 rpm to 2000 rpm
- Use on most types of flooring
- Scuff and mark resistant
- Slip resistant

**F1** FLOORCARE

Gloss Plus is a clear, non-yellowing, high gloss finish designed to enrich and enhance the natural colours of all types of floors. Gloss Plus conforms to the Australian Standard for the Slip Resistance rating D1 classification as per AS4586:2013. Gloss Plus is a simple to use sealer / sealer finish designed for use on a variety of floors from vinyl to terrazzo and timber.

Gloss Plus reduces maintenance, inventory and training costs in complex sites such as schools, universities, hospitals and healthcare by simplifying maintenance programs. In institutional and office environments apply 4 to 6 coats of Gloss Plus to vinyl, terrazzo and timber floors. In retail environments Gloss Plus may be applied as a one-step system or Gloss Plus may be applied as a base sealer to enhance shine and film clarity.

### DIRECTIONS FOR USE

**Stripping:** Remove existing polish and sealer using Quick Strip, ensuring to follow all label directions. Rinse area with a solution of Neutrol at a dilution 9mL/L of water. After the stripped surface is dry and has been swept the surface is now ready to seal.

**Sealing:** Apply first coat of Gloss Plus using a clean polish applicator and allow 15-30 minutes drying time. Airflow and environmental conditions will influence the drying time required between coats. Apply a further 4-6 coats of Gloss Plus ensuring each coat is laid on a tack free surface. Allow surface to cure for 24 hours before burnishing.

**NOTE:** Apply cautiously when floor temperatures are lower than 10°C. Apply thin coats of Gloss Plus and allow additional drying time between coats.

**Daily Maintenance:** Sweep floor and mop or scrub daily with Neutrol. Use Quick Shine 2-3 times per week to improve gloss and increase durability and slip resistance. Buff/burnish floors daily.

### SAFETY DATA

For further information refer to the Safety Data Sheet (SDS)

### HEALTH AND SAFETY STATEMENT

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/ disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.
